

Build Tower

Build a pyramid-shaped tower given a positive integer number of floors. A tower block is represented with "*" character.

For example, a tower with 3 floors looks like this:

```
[  
  "  *  ",  
  " *** ",  
  "*****"  
]
```

And a tower with 6 floors looks like this:

```
[  
  "    *    ",  
  "   ***   ",  
  "  * * * * ",  
  " * * * * * ",  
  "***** ",  
  "***** "  
]
```
